ABOUT ME

Latest Job experience

January 2024
to
February 2026

Mobile developer

SportMA

- Developed high-quality mobile applications using Flutter, ensuring optimal performance, scalability, and user experience.
- Implemented Clean Architecture with a strong focus on Separation of Concerns (SoC), improving code maintainability and scalability.
- Utilized BLoC state management to efficiently handle complex app states, ensuring smooth and reactive UI updates.
- Integrated third-party services such as Google Maps, OpenStreetMap, and Firebase to enhance app functionality and user engagement.

April 2023
to
December 2023

Mobile developer & Team leader

NUMERIDEV

- Designed and developed high-performance mobile applications using Flutter, prioritizing scalability, efficiency, and user experience.
- Led and guided team members, fostering collaboration and sharing best practices in Flutter development.
- Developed a Flutter-based web application utilizing the OpenAI API to deliver AI-powered features and enhance user interaction.

Independent Project

Daky AI Mobile Application

- Designed and developed high-performance mobile applications using Flutter, prioritizing scalability, efficiency, and user experience.
- Led and guided team members, fostering collaboration and sharing best practices in Flutter development.
- Developed a Flutter-based web application utilizing the OpenAI API to deliver AI-powered features and enhance user interaction.

October 2022
to
March 2023

Freelancer

Upwork

- Optimized and upgraded client projects, improving app performance, speed, and overall user experience through targeted enhancements.
- Refactored legacy code to ensure maintainability, scalability, and alignment with modern development best practices.
- Implemented performance improvements and streamlined codebases, reducing app load times and enhancing responsiveness across platforms.
- Upgraded existing features and integrated new technologies, ensuring projects remain competitive and aligned with current trends.
- Collaborated closely with clients, understanding their goals to deliver tailored optimizations that meet evolving business needs.

June 2022
to
September 2022

Mobile developer

Tython

- Designed and developed innovative mobile applications for electric scooters "Trotinet" using Flutter, gaining valuable insights into mobile development and user-centric design.
- Integrated real-time GPS tracking and route optimization features, learning to implement location-based services to enhance user navigation and experience.
- Created user-friendly interfaces, refining my skills in UI/UX design and ensuring smooth, intuitive interactions for scooter users.
- Developed features such as battery monitoring and location-based services, learning to enhance the app's functionality while keeping the user experience at the forefront.
